### **Detailed Action**

The Terminal Disclaimer over US Patent 6,174,868 has been received, entered and is acceptable. The obviousness type double patenting rejection over this patent is withdrawn. However, the issue of common ownership at the time the invention was made and a potential rejection of the claims under 35 USC 103(a) (see below) remains to be resolved.

Claims 23 and 28 are directed to an invention not patentably distinct from claims 1-11 of commonly assigned US 6,174,868. Specifically, the claims are not patentably distinct for the reasons set forth in the obviousness type double patenting rejection made in the previous Office Action.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302). Commonly assigned US 6,174,868, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

Art Unit: 1636

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Claims 23 and 28 are directed to an invention not patentably distinct from claims 1 of commonly assigned 6,608,191 and claims 1 and 7 of commonly assigned 6,423,489. Specifically, the claims are not patentably distinct for the reasons set forth in the obviousness type double patenting rejection made in the previous Office Action.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302). Commonly assigned US 6,423,489 and 6,608,191, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Applicants have responded to these rejections by stating that the instant application and the patents **are currently commonly owned** by Isis Pharmaceuticals, Inc. and applicants state the dates on which the previous assignees assigned their rights to Isis Pharmaceuticals, Inc. In response, the examiner notes that a statement concerning **current ownership** of the conflicting patents and the instant application is not sufficient to determine whether patents 6,174,868, 6,608,191, 6,423,489 would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) because applicants' statement says nothing about whether the commonly assigned cases were commonly owned **at the time the invention was made** and hence whether they qualify as prior art under 35 U.S.C. 102(e), (f) or (g). As noted in the previous Office Action and again here, applicants can address this issue in the following fashion:

In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter. A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Art Unit: 1636

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23 and 28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-5 of copending Application No. 10/454,293. Although the conflicting claims are not identical, they are not patentably distinct from each other because of reasons of record in the previous Office Action.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicants do not traverse this rejection but instead indicate that the rejection be held in abeyance until one of the applications has been allowed. It is noted that the provisional obviousness type double patenting rejection, made in the previous Office Action, over claims 2-5 of the 10/457,304 application has been rendered moot by the abandonment of said application.

The rejection will therefore be maintained.

Art Unit: 1636

Any rejections not repeated in this Office Action are withdrawn.

No Claims are allowed.

Claims 24-26 and 29-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
